

MoveAI Beta Program – AAOS 2025

Smarter Recovery. Every Step of the Way.

Built for orthopedic surgeons, by orthopedic experts.

Why MoveAI?

MoveAI is a **purpose-built digital recovery platform** designed specifically for **orthopedic surgeons performing TKR & THR**. Unlike generic remote monitoring tools or device company add-ons, **MoveAI is simple, clean, and fits seamlessly into your workflow—without extra admin work.**

What Makes MoveAI Different?

- **Designed by Surgeons & Ortho Experts** – Not a tech company guessing at healthcare.
- **Simple, Efficient, and AI-Ready** – No complex dashboards or unnecessary alerts.
- **Zero Extra Work for Your Staff** – MoveAI runs in the background, keeping you updated.
- **Focused on Patient Engagement & Better Outcomes** – **90%+ engagement rates.**

What MoveAI Does (Beta Program Features)

Effortless Post-Op Monitoring – MoveAI guides patients through recovery with easy check-ins and progress tracking.

Reduces Unnecessary Follow-Ups – Surgeons only get alerts when intervention is needed.

Fully Integrated with Your Workflow – No extra manual data entry required.

High Patient Engagement – Simple daily interactions keep patients on track..

Coming Soon: AI-driven insights and reimbursement integration (RTM/RPM billing).

MoveAI: Built for Orthopedic Surgeons, By Orthopedic Experts.

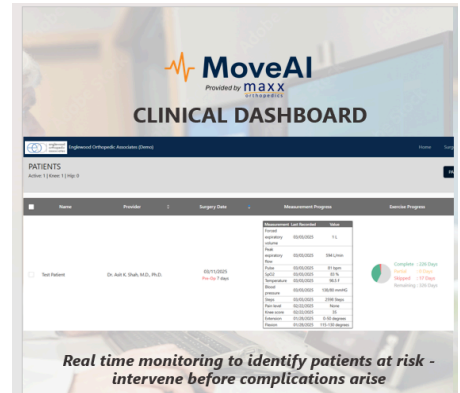

FAQs: What Surgeons Want to Know

1. How is MoveAI different from Zimmer's mymobility or Force Therapeutics?

MoveAI is **not tied to a single implant brand** and is designed for **surgeons, not just patients**. Unlike competitors, we prioritize **clear, actionable insights** and a **seamless workflow** rather than overwhelming surgeons with data.

2. How does MoveAI reduce my post-op workload?

MoveAI automatically **tracks patient progress and flags concerns**—so your team only sees **the patients who need attention**. No unnecessary clinic visits, phone calls, or admin work.

3. Will my patients actually use this?

Yes! **90%+ engagement rates** because MoveAI is **simple, intuitive, and easy for older adults to use**. No tech expertise required.

4. Is MoveAI reimbursable under RTM codes today?

Not yet—but reimbursement integration is coming soon. We are **focused on proving clinical value first**. MoveAI will automate billing documentation for RTM/RPM codes in future releases.

5. How can I try MoveAI in my practice?

MoveAI is currently in **beta**, and we are looking for **forward-thinking orthopedic surgeons** to help refine the platform before full launch.

Join the MoveAI Beta Program

- ◆ Get early access to MoveAI and influence development.
- ◆ Be part of a select group of surgeons driving digital innovation.
- ◆ Receive VIP support and first access to AI & reimbursement features.
